DETAILED ACTION

Reply Under 37 CFR 1.111

1. The submission of the reply filed on 04/10/08 to the non-final Office action of 10/10/07 is acknowledged.

Information Disclosure Statement

2. The information disclosure statement (IDS) filed on 10/10/07 fails to comply with 37 CFR 1.97(c) because it lacks a statement as specified in 37 CFR 1.97(e) or fee under 37 CFR 1.17 (p). It has been placed in the application file, but the information referred to therein has not been considered. Applicant's attention is directed to the fact that, contrary to the Applicant's position, said IDS was not filed before the first action on the merits or within 3 months of filing of the instant application. Therefore, the aforementioned statement or fee are required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 4 and 5, are rejected under 35 U.S.C. 102(b) as being anticipated by US/5,712,610 to Takeichi et al (Takeichi).

Regarding claims 4 and 5, Takeichi disclosed (Fig. 1A, 1B) a protective element, comprising: a heat-generating member (3); and a low-melting metal member (5) on a substrate (2) between a pair of electrodes (7a, 7b) that pass current through the low-melting member (5), in which the low-melting metal member (5) is blown out by the heat generated by the heat-generating member (3); wherein a thin-walled component (the convex central portion) formed in the low-melting metal member (5) blows out as an effect of the heat-generating member (3) generating heat, so that the lateral cross section of at least part of the low-melting metal member (5) divides into at least two independent cross sections along the entire length thereof in the direction of current flow (inherently, since said low-melting metal member (5) separates (breaks) into two distinct separate portions so as to interrupt the circuit).

Response to Arguments

5. Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
